

IN THE DRAWINGS:

Please amend Fig. 1b as shown in red in the attached drawing.

IN THE CLAIMS:

Please cancel claims 3 and 10 without prejudice.

Please amend claims 1, 2, and 8 as follows:

1. (Twice - Amended) A high intensity discharge lamp assembly, comprising:
- a) a high intensity discharge lamp comprising a hermetically sealed glass envelope containing a mixture of ionizable elements and/or compounds;
 - b) a sealed ballast container mounted adjacent to said glass envelope;
 - c) an electronic ballast contained in said container, said ballast having an input and an output;
 - d) an anode disposed in said envelope and electrically coupled to one pole of said ballast output;
 - e) a cathode disposed in said envelope and electrically coupled to another pole of said ballast output; and
 - f) coupling means for coupling said input of said ballast to a DC power source;
 - g) heat sink means for dissipating heat from said ballast; and
 - h) a waterproof protective container covering said envelope and said ballast container, said waterproof protective container having a transparent window.

Bleat

2. (Twice - Amended) A lamp assembly according to claim 1, further comprising:

i) a waterproof protective container covering said envelope, said waterproof protective container having a transparent window.

B²

1. ~~8.~~ (Twice - Amended) An underwater lighting system comprising:

a) a high intensity discharge lamp comprising a hermetically sealed glass envelope containing a mixture of ionizable elements and/or compounds;

b) a sealed ballast container mounted adjacent to said glass envelope;

c) an electronic ballast contained in said container, said ballast having an input and an output;

d) an anode disposed in said envelope and electrically coupled to one pole of said ballast output;

e) a cathode disposed in said envelope and electrically coupled to another pole of said ballast output;

f) coupling means for coupling said input of said ballast to a DC power source;

g) heat sink means for dissipating heat from said ballast; and

h) a waterproof protective container covering said envelope and said ballast container, said waterproof protective container having a transparent window.

Please add the following new claim:

B *16*. (New) An underwater lighting system according to claim *3*, further comprising:

i) a battery pack wherein said coupling means comprises a cable coupling said input of said ballast to said power output of said battery pack.
